Subject: Language in Draft
Date: Friday, October 14, 2016 4:26:35 PM

Hello Sara,

I wanted to get back to you on a number of items. They are listed below:

1. Comment 4 - We appreciate you putting the language in the permit itself and will be satisfied upon verification.
2. Comment 9 - We are satisfied with your explanation that any waste storage structure which overflowed would be in violation.
3. Record Keeping Requirements Land Application Requirements - EPA had recommended a minimum frequency of yearly for the date(s) of manure application equipment inspection and calibration. This has not been incorporated.
4. Record Keeping Requirements Land Application Requirements bullets 7 and 8 - EPA is questioning why Chloride is not included as part of the parameters tested since there is a state limitation set for Chloride land application? Please provide an explanation if the testing requirement is deemed unnecessary by NYSDEC.

I look forward to hearing from you shortly regarding the last two items so that we may continue to resolve EPA's comments on the permit. Sorry the turnaround time was this long, but I had taken a few days off and had other issues to deal with.

Andrea
